DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-9, drawn to an apparatus, classified in class 422, subclass 131.
 - II. Claims 10-34, drawn to a process, classified in class 526, subclass 64.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process can be practiced by another materially different apparatus which does not have a bypass valve for controlling the flow of vapor through the vapor bypass line.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
5. During a telephone conversation with Michael Fletcher on June 21, 2004 a provisional election was made without traverse to prosecute the invention of Group I, claims 1-9. Affirmation of this election must be made by applicant in replying to this

Office action. Claims 10-34 withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

7. This application is in condition for allowance except for the presence of claims 10-34 to an invention non-elected without traverse. Accordingly, claims 10-34 have been cancelled.

Examiner's Amendment

8. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Michael Fletcher on June 23, 2004.

The application has been amended as follows:

Claims 10-34 have been cancelled.

In the title, the words "Process and" have been deleted and --- A --- has been inserted.

9. The following changes to the drawings have been approved by the examiner and agreed upon by applicant: the reference number "58" will be deleted from figures 1 and 3. In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes.

Reasons for Allowance

10. Claims 1-9 are allowed.
11. The following is an examiner's statement of reasons for allowance: The instant application is deemed to be directed to a non-obvious improvement over the invention patented in Pat. No. US 6,559,247 B2. The improvement comprises a vapor bypass line which not only bypasses a condenser but also connects to a collection tank.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
